

F21 Event  
The Modern Workplace for  
Financial Services  
Response from the audience

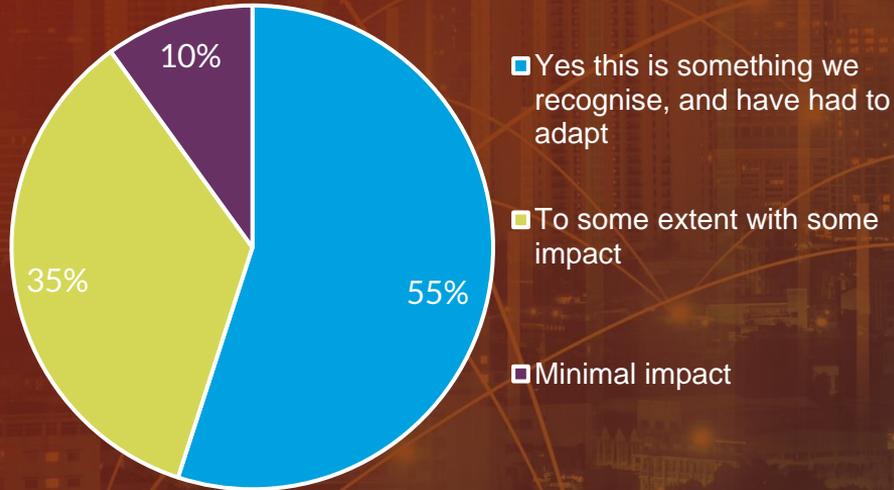

## What do you see as the top characteristics which define a Modern Workplace?

*Being able to fit your job around your life, and not the other way round, is essential in a modern workplace. The latest cloud technology is a great enabler for this*

# Do you feel you work in a multi-generational workforce with different motivations, preferences and needs? (Gen X, Millennial etc.)

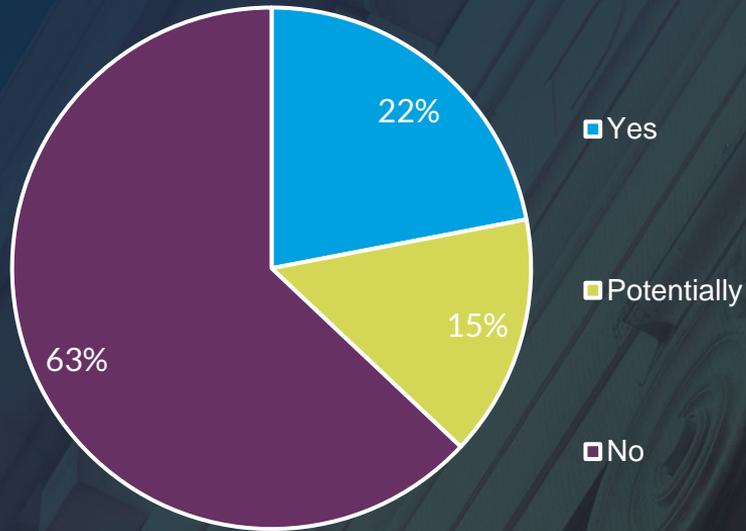

*We're all living and working longer which means two things;*

- 1. The workforce age span is larger than ever*
- 2. Within this age span, multi-generations have different attitudes to both work and behaviours*

*A modern workplace need to be able to cater for the strengths and weaknesses of each generation*

Do you think Artificial Intelligence (AI) will put jobs within your business at risk in the next five years?

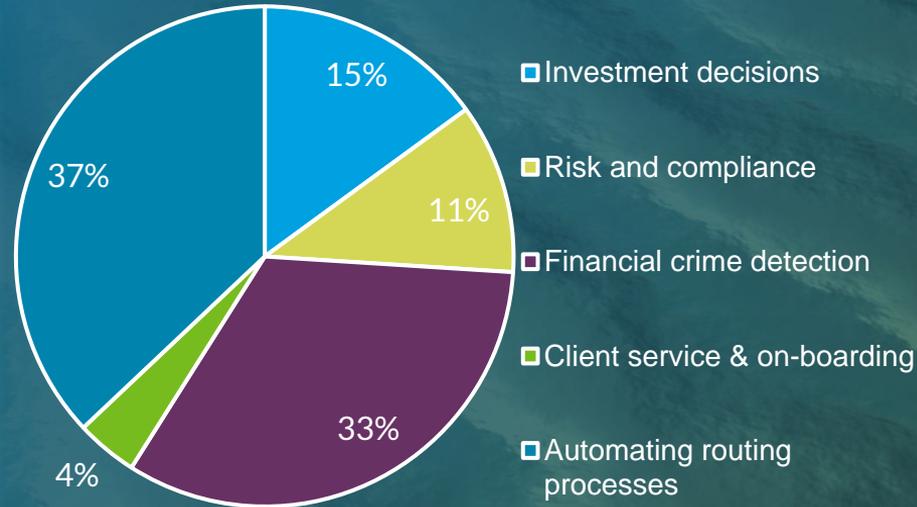

*Will robots take my job?*

*There is an interesting website which will give you a percentage likelihood!*

*<https://willrobotstakemyjob.com/>*

## Where do you think AI presents the greatest opportunity in FS?

*It's going to be the low hanging fruit right now that will make the difference. In particular, using AI to spot patterns and then make predictions. In Investment Management this could be a wider range of tasks from compliance checks through to investment portfolio modelling*
